TOKEN Issusing Module VTM20 REV2

Introduction

Token issuing module is responsible for the sale,assignment and verification of token.The module has two distribution systems,guarantee token storage and selling speed at the same time.

Production feature

- Two sale boxes can handle both types of token at the same time.
- Rotary token distribution and elastic token delivery are adopted to ensure that there will be no token adhesion and token adsorption in the channel.
- Modular design, integrated disassembly, easy maintenance.
- A token box can be added to increase the equipment capacity.

Specification

Token spec	Diameter 30mm, thickness 2〜3mm
Process speed	≥1 second
Token box	800〜1000 pcs
Fill ballot Boxes	800〜1000 pcs
Recycle box capacity	≤2500 pcs
Operating temperature	-10℃〜50℃, 20%RH〜95%RH(non-condensing)
Storage temperature	-20℃〜60℃
Port	RS232
MCBF	≥70,000
MTTR	≤30 min
Power	DC24V
Dimension	470mm（L）* 315mm（W）* 1345mm（H）
