## Introduction

This module is the core module of automatic ticket collector. There are 2 ticket recycling bins, and different types of tickets can be put into different recycling bins according to the prompts

Product feature

- Equip with sensor to detect container full status and support automatic switch between two magazine
- Ticket shutter is there to prevent foreign object from entering
- Unacceptable ticket will return from insert slot.
- Preventing ticket jam caused by aging of belt.
- Preventing belt abrasion, avoid rubber adsorbed on the ticket surface.
- Compact design for tiny style AG.

Specificaion

Collection speed	≤ 1s / ticket
Container	Two container, each ≤ 750 tickets
Operating temperature	0℃ ～ 50℃， 20% RH ～ 95% RH (non-condensing)
Storage temperature	-20℃～60℃
Port	RS232
MCBF	≥200,000
MTTR	≤30 min
Power	DC24V
Consumption	50W
Dimension	215mm(W) * 480mm(D) * 850mm(H)
