

Intelligent ticket checking machine

Introduction

This Intelligent ticket checking machine adopts contactless IC card and QR code as the proof of passage according to the actual use requirements. And according to the operational requirements, functions and ticket processing, verification process can be customized

Product feature

- Support QR code verification and enable the corresponding identification technology according to customer requirements.
- Dustproof and rainproof can be used outdoors
- Seven colors of indicator light
- Capability to work in offline mode and had data storage capability.

Specification

| | |
|-------------------------|-------------------------------|
| Indicator light | seven kinds of color |
| Pass through | ≥ 40 person per min |
| Ticket processing | ≤ 1sec |
| Ticket Reading distance | 0-60mm |
| Passenger display | 10.1"TFT-LCD |
| Operating temperature | -10°C-60°C |
| Weight | 30KG |
| Dimension | 250mm(W)* 500mm(D)* 1462mm(H) |
