# Elis Infotech

# Office Gate（facial）

## Introduction

This automatic ticket checking machine adopts flap mechanism and face recognition, contactless IC card and QR code as the proof of passage according to the actual use requirements. And according to the operational requirements,functions and ticket processing, verification process can be customized

## Production feature

- Support Facial recognition technology, QR code verification and enable the corresponding identification technology according to customer requirements.
- In the event of an emergency, the flap is opened by emergency button control to ensure safety.
- Capability to work in offline mode and had data storage capability.

## Specification

| | |
|---|---|
| Width of aisle | 800mm |
| Pass through | ≥ 30 person per min |
| Ticket processing | ≤ 1sec |
| Ticket Reading distance | 0-60mm |
| Passenger display | 8"TFT-LCD |
| Operating temperature | < 95% (non-condensing) |
| Weight | 280mm(W)* 800mm(D)* 1244mm(H) |
| Dimension | |
